- **GOLD LAYER DATASET (PARQUET TABLE)**

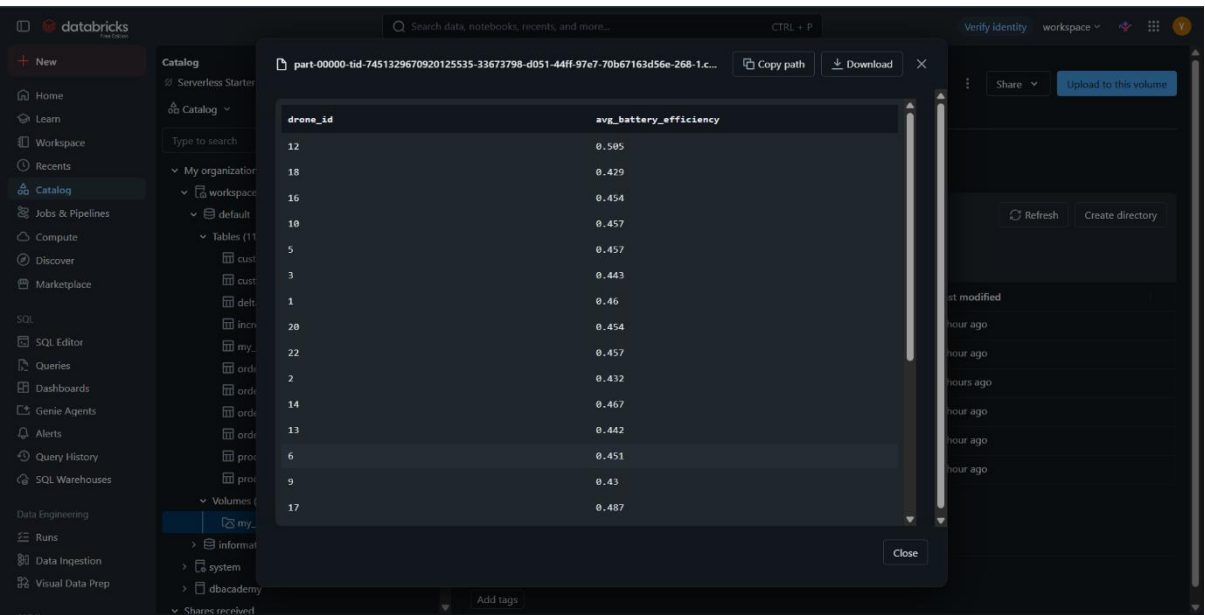

avg delivery time

The screenshot shows the Databricks web interface. On the left is a sidebar with navigation options like Home, Workspace, Catalog, and SQL. The main area displays a table view for a Parquet dataset. The table has two columns: 'drone\_id' and 'avg\_delivery\_time\_minutes'. The data is presented in a scrollable list format. At the top of the table view, there are buttons for 'Copy path' and 'Download'. On the right side, there are options to 'Share' and 'Upload to this volume', along with a 'Refresh' button and a 'Create directory' button. The table data is as follows:

| drone_id | avg_delivery_time_minutes |
|----------|---------------------------|
| 12       | 48.98                     |
| 18       | 44.78                     |
| 16       | 58.63                     |
| 10       | 47.52                     |
| 5        | 41.95                     |
| 3        | 40.93                     |
| 1        | 47.26                     |
| 20       | 53.58                     |
| 22       | 42.05                     |
| 2        | 40.7                      |
| 14       | 50.11                     |
| 13       | 52.92                     |
| 6        | 45.26                     |
| 9        | 51.33                     |
| 17       | 46.92                     |

battery efficiency

The screenshot shows the Databricks web interface, similar to the one above, but displaying a different dataset. The table view shows two columns: 'drone\_id' and 'avg\_battery\_efficiency'. The data is presented in a scrollable list format. At the top, there are 'Copy path' and 'Download' buttons. On the right, there are 'Share' and 'Upload to this volume' options, along with 'Refresh' and 'Create directory' buttons. The table data is as follows:

| drone_id | avg_battery_efficiency |
|----------|------------------------|
| 12       | 0.585                  |
| 18       | 0.429                  |
| 16       | 0.454                  |
| 10       | 0.457                  |
| 5        | 0.457                  |
| 3        | 0.443                  |
| 1        | 0.46                   |
| 20       | 0.454                  |
| 22       | 0.457                  |
| 2        | 0.432                  |
| 14       | 0.467                  |
| 13       | 0.442                  |
| 6        | 0.451                  |
| 9        | 0.43                   |
| 17       | 0.487                  |
